

Aluminum sealing caps with 6 & 5-point standard closure. To protect groundwater measuring points.

The material chosen for the caps consists of a particularly tough aluminium alloy which is weather-resistant, frost-proof and corrosion-resistant.

Applications

- Sealing drilled boreholes
- Groundwater monitoring wells
- Dewatering wells
- Water abstraction wells
- Instrument borehole

Features

- Heavy duty Aluminium construction
- Lockable
- Powder coated
- Corrosion resistant
- Lightweight
- Weatherproof
- 6 & 5 point screw locking device
- 1¼" to 6" BSW female thread

Specifications	
Cover and frame	Aluminum
Surface	Chromated and powder coated
Thread	Female pipe thread
6-point standard lock and pipe thread secured with grub screws	1¼, 1½, 2", 3", 4", 4½, 5", 6"
5-point safety lock and pipe thread secured with grub screws	2", 3", 4", 4½, 5", 6"
