

Robust flanged wellheads for the secure sealing the top of water wells and investigation boreholes.

Water level monitoring and pump riser pipe ports plus cable gland options are available to suit application.

Applications

- Sealing drilled boreholes
- Groundwater monitoring wells
- Dewatering wells
- Water abstraction wells

Options

- Rope support
- Cable gland
- Water level port

Features

- Heavy-duty PVC construction
- DN80 to DN200
- Glued connection for security
- Available with or without monitoring ports
- Available with water level, pump riser & cable ports

Specifications	
Compatible with well casing sizes	DN80, 100, 115, 125, 150, 175, 200, 250, 300
Well casing connections	Glued socket
Cable gland	M20
Galvanised socket connection	1", 1 1/4", 1/2", 2", 3", 4" BSPF
Flange	PVC
Flange gasket	NBR
Threaded connection	V2A
Bolts, nuts & washers	V2A/M12
Water level port	1/2" with blanking plug
